Frostproof Apple Tree

PATENT NO. 722

A crop of apples every year, as it has the blooming time set back 30 days. It blooms in the State of Virginia the 18th of May, after the danger of frost is well past. It is also pest resistant.

It ripens in the fall along with the other winter apples, such as the wine-sap, etc. A new winter apple with a nice dark bronze color. Fine for general home use.

Price \$5.00

Send in your order early as there is only a small number available.
